| PROFILE SUMMARY

Web Developer and Data Analyst with professional experience in full-stack web development, backend APIs, databases, and data-driven applications. Proficient in Python, React.js, FastAPI, JavaScript, and SQL, with experience in application development, troubleshooting, automation, and dashboard reporting. Skilled in prompt engineering and leveraging AI tools to improve development workflows, automate tasks, and generate structured, reliable outputs for data collection and analysis.

| SKILLS

- **Programming Languages:** Python, JavaScript, Java, C/C++
- **Web Development:** React.js, Node.js, Express.js, FastAPI, HTML5, CSS3, Bootstrap
- **Databases:** MySQL, MongoDB
- **Data Science & Analytics:** Power BI, Microsoft Excel (Data Intel), Pandas, NumPy, Matplotlib
- **AI Tools & Frameworks:** Scikit-learn, ChatGPT, Claude, GitHub Copilot, Julius AI
- **Tools & Platforms:** Git, GitHub, WordPress

| CERTIFICATIONS

- Data Analytics
- Python Programming
- React & Redux
- Data Structures & Algorithms using C/C++
- Cybersecurity Internship
- Web Technology
- Digital Electronics & VLSI Intern

| EXPERIENCE

Junior Developer - E-TREE Association **Pune**

Engineered responsive web interfaces utilizing React.js, Bootstrap, and modern JavaScript. Enhanced an educational platform with React.js and FastAPI, delivering requested features and resolving software defects. Automated workflows and report generation using database scheduling and stored procedures. Optimised overall website usability, technical performance, and cohesive visual design consistency.

Graphic Designer and Front-End Developer – Infolead **Pune**

Designed print-ready product catalogues and marketing collaterals, managing visual assets, layouts, and typography. Crafted high-impact website graphics, digital banners, and interactive UI components. Built responsive web pages utilizing HTML, CSS, and JavaScript, transforming mockups into functional web experiences. Maintained strict brand consistency and premium visual standards across all digital channels.

Business Operations Manager - Sai Om Infotech **Pune**

Directed daily cyber cafe and digital storefront operations, maintaining hardware infrastructure and stabilizing critical workflows to ensure business continuity. Utilized Microsoft Excel for advanced financial data analytics, auditing daily transactions and evaluating revenue patterns to optimize stock procurement. Supported 150+ high-volume customers daily, delivering rapid technical assistance and resolving service queries within a fast-paced retail environment. Facilitated client navigation through complex online portals, executing high-stakes submissions for government recruitment, scholarships, and international university admissions.

| PROJECTS

SM Analyst — AI-Based Stock Analytics Web Application

Architecting an advanced stock analytics platform designed to evaluate market trends and financial data points. Integrating diverse data feeds and sentiment analysis algorithms to generate meaningful investment insights and building interactive visualization dashboards to track asset performance. Currently advancing development workflows by undertaking specialized **AI & Machine Learning coursework**, targeting the future integration of proprietary, custom-built machine learning models to automate predictive market analysis.

Kanha Dairy Billing System - Automated Micro-Business Billing System

Engineered a secure digital billing platform tailored to streamline operations for micro-businesses. Implemented robust user authentication features, including **secure login/registration modals and a custom OTP verification system** to safeguard business data. Developed full-stack modules enabling owners to log daily dairy sales, track milk product transactions, and log inventory data points. Integrated automated communication APIs to **dynamically compile monthly statements and broadcast digital invoices automatically to customers via WhatsApp**, minimizing manual billing overhead and maximizing payment collection efficiency.

| EDUCATION

B.Sc. Cyber & Digital Science — CGPA: 9.12/10 (GRADE: A+)

BSMPL's Jaikranti College of Computer Science & Management Studies
Savitribai Phule Pune University
2023 – 2026
